E-mail: nikhil.janti@gmail.com

Summary:

Certified DevOps Engineer with 4.4+ years of hands-on experience in creating, automating, deploying services, and managing applications and infrastructure in cloud environments. Proficient in CI/CD pipelines, Infrastructure as code (IaC), and monitoring tools. Adept at collaborating with cross-functional teams to streamline workflows, improve system reliability, and reduce deployment times and cost-optimization in cloud.

Technical Skills:

Cloud/Tools worked on:

Amazon Web Services, Microsoft Azure Terraform Docker, Kubernetes, HELM, Istio GIT, GitHub, JFrog JFrog Jenkins, ArgoCD, GitHub Actions BASH, Python (Automation) OpenSearch, Instana, Datadog, Grafana.

Professional Experience

Daimler Truck Innovation Center (Mercedes - Benz Trucks), **Bangalore, KA.**

Senior Infrastructure/DevSecOps Engineer (July 2022 – Present)

Infrastructure/DevSecOps Engineer (Nov 2022 – July 2022)

Graduate Engineer Trainee (Jan 2022 – Nov 2022)

- Hands-on experience in **designing, automating, and maintaining build and configuration management tools** such as *Maven*, *Gradle*, and *Ansible*.
- Skilled in **troubleshooting build, deployment, and configuration issues** across diverse environments.
- Proficient in **integrating package management tools** including *JFrog Artifactory* and *Docker registries* for seamless artifact handling.
- Experienced in **Docker containerization** with multiple base images (*Alpine*, *Distroless*, *Debian*, and *Windows*).
- Strong understanding of **CI/CD pipelines**, with expertise in **Jenkins** and **GitHub Actions**, including proposing and implementing process optimizations.
- Knowledgeable in **network security and SSL certificate management**, covering protocols such as *TCP/IP*, *HTTP/HTTPS*, and *TLS/SSL*.
- Implemented **end-to-end automated deployment pipelines** integrating *Git*, *Jenkins*, *Maven*, *Artifactory*, *SonarQube*, *Grafana*, and *Argo CD* within secure private networks.

- Hands-on experience in **setting up service mesh architectures** for *Kubernetes (K8s)* deployments.
- Expertise in **building production-grade AWS infrastructures** from scratch, including VPC design with public and private subnets for high-traffic applications.
- Configured **AWS Transit Gateway** and **Direct Connect Gateway** to establish secure connectivity between cloud and on-premise networks.
- Proficient in **database setup and integration** of relational and non-relational databases such as *PostgreSQL* and *MongoDB*.
- Experience in **configuring Single Sign-On (SSO)** and integrating with *Active Directory (AD)* for enterprise applications.
- Executed **user migration from on-premise AD to Microsoft Azure AD**, ensuring secure identity management.
- Designed and deployed an **AWS-based solution** for hosting an in-house ETL tool used for **migrating images and relational data**.
- Experienced in **building Azure infrastructure**, including *VNETs*, *Load Balancers*, *AKS clusters*, and deploying applications on *AKS*.
- Hands-on experience in **setting up and deploying applications on Azure App Service** with robust configuration management.
- Built resilient API communication layer with asynchronous messaging and Istio (retries, circuit breakers, timeouts), ensuring high availability and fault-tolerant microservices.

Projects

- **Infrastructure Creation on Cloud Platform like AWS and Azure:** Provisioning Infrastructure services and Network for application deployment from scratch.
- **CI/CD Pipeline Automation:** Automated end-to-end deployment pipeline for a microservices-based application, reducing deployment time by 40%.
- **Data Migration:** Migrated data from on-prem to cloud platform like AWS and Azure, and cloud to cloud platform.
- **On-Prem to Cloud Migration:** Migrated applications from on-prem to cloud by designing resilient and highly scalable and fault tolerance architecture.
- **Infrastructure Monitoring:** Developed and deployed a comprehensive monitoring solution using AWS CloudWatch, improving system observability, and reducing incident response time.
- **Infrastructure Cost Optimization:** Implemented a cost-effective cloud architecture on AWS, Optimized Infra post migration and reduced Infra costs by 35%.

Leadership

- Led cross-functional teams to deliver scalable solutions, driving technical decisions and ensuring timely project execution.
- Took ownership of critical services, leading design discussions and resolving production issues with minimal downtime.

Certificates:

- Microsoft Azure Fundamentals (AZ-900).
- AWS Cloud Practitioner 2 (AWS CLF - 02).
- Udemy Certified Kubernetes Administrator Developer.
- Edureka certified DevOps Engineer.

Academic profile:

- Bachelor of Engineering in Computer Science (2017-2021) from Visvesvaraya Technological University

Declaration:

I hereby declare that all the things furnished above are true as per my knowledge.
